AI and chatbots	OpenAI, Claude, Claude Code, chatbots and automated workflows for customer service, lead qualification and operational support
Analysis and quality	Requirements gathering, testing, debugging, documentation and problem solving

EXPERIENCE

Automation Manager
Sep 2025 - May 2026

Evo Coaching e Editora LTDA - Marcio Micheli
Águas Claras, DF

- Responsible for digital communication management and website maintenance, keeping pages, content, and systems updated, functional, and aligned with business strategy.
- Created and maintained launch and flash-sale campaigns, including bulk WhatsApp outreach through ManyChat, email campaigns through ActiveCampaign, and relationship automation workflows.
- Managed groups with Redirect+ and Sendflow, as well as communication workflows for events and databases with more than 13,000 contacts.
- Created payment links in Teachable and handled direct communication with the contact base, including event countdowns, instruction letters, and no-show protocols.

Systems and Automation Analyst
Aug 2024 - Sep 2025

BRL Educação - Formação Empresarial
Brasília, DF

- Analyzed and integrated systems and tools to connect marketing, sales, and financial processes.
- Configured CRMs, automations, fields, pipelines, and service workflows focused on organization and operational efficiency.
- Built customized solutions in Lovable and supported the use of AI to optimize internal routines.
- Integrated tools through webhooks and platforms such as Make, Zapier, Pluga, and Kommo.

AI, Automation and Web Development
2024 - Present

Independent projects / freelance services
Remote

- Created and maintained WordPress pages, landing pages, and e-commerce adjustments for clients.
- Built automations with Make and n8n for customer service, CRM, forms, lead capture, and lead follow-up.
- Implemented chatbots and integrated workflows with WhatsApp, CRM, and digital marketing tools.
- Created simple, functional solutions to reduce manual tasks and centralize information.

Communication and Operations Analyst
Feb 2023 - Dec 2024

Conectados com Deus - Church
Brasília, DF

- Managed orders, operational organization, and support for the promotion of free Bible courses in digital and in-person environments.
- Created landing pages, digital assets, and communication materials for campaigns and internal projects.
- Supported live broadcasts, recordings, video/photo editing, and content operations for digital channels.

Administrative Assistant - Young Apprentice

Sep 2021 - Dec 2021

KPMG

Belo Horizonte, MG

- Cataloged and organized physical documents during an administrative archive relocation process.
- Supported administrative routines with a focus on punctuality, professional ethics, and record integrity.

EDUCATION

Systems Analysis and Development

PROJECTS AND SYSTEMS

Hands-on work focused on integration, automation, websites, and digital solutions for sales operations, communication, and customer service.

CRM integration with websites and systems

Configuration of pipelines, fields, bots, forms, webhooks, and automations to connect lead capture, customer service, and lead tracking.

Sales process automation

Workflows using Make, n8n, Zapier, and Pluga to reduce manual tasks, standardize steps, and improve information traceability.

Web development and WordPress

Creation and maintenance of landing pages, institutional pages, and website/e-commerce adjustments using WordPress, Hostinger, cPanel, HTML, and CSS.

Chatbots and automated customer service

Design of customer service, qualification, and lead nurturing workflows using Kommo, WhatsApp, marketing tools, and AI.
